IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: Takashi Naganawa, et al.  
Serial No.: 10/791,772  
Filed: March 4, 2004  
Title: LIQUID COOLING SYSTEM  
Group: 2835  
Examiner: PAPE, Zachary  
Confirmation No.: 4408

**STATEMENT OF SUBSTANCE OF INTERVIEW**

Mail Stop: Issue Fee  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

June 2, 2006

Sir:

Applicants would like to thank the Examiner for the courtesy extended during the telephonic interview conducted on May 11, 2006. During the interview, the Examiner indicated that the application appeared to be substantially in condition for allowance. However, there were some issues of indefiniteness pending with regards to claims 3 and 5. An agreement was reached to amend the language in these claims in order to overcome the issues of indefiniteness, and for consistency based on amendments that have been previously made to the claims.

Specifically, it was agreed to amend the claims as follows:

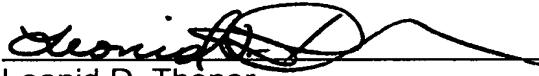

- (1) Claim 3, line 15, "a tank connected to said radiator through said at least two metal conduits" has been replaced with --a tank connected to said radiator through a direct connection to said at least two metal conduits--

- (2) Claim 3, line 19, "wherein said pump is connected to said tank through said metal conduit" has been replaced with --wherein said pump is connected to said tank --.
- (3) Claim 5, line 4, "the suction port" has been replaced with --a suction port--.
- (4) Claim 5, line 5, "said discharge port" has been changed to -- a discharge port--.

The Examiner indicated that these corrections were minor and that they could be performed by an Examiner's Amendment.

Respectfully submitted,

ANTONELLI, TERRY, STOUT & KRAUS, LLP.
